

THE ANTIFUNGALS:

The Anti-fungal currently in our portfolio is Terbimax (Terbinafine Hydrochloride). It is available as the Tablet and Cream and the profile is shown below.

7	Terbimax	Terbinafine	Cream 15g/gm and Tablet 250mg	Onychomycoses caused by dermatophytes. Treatment of infections caused by Tinea capitis, Tinea corporis, Tinea pedis and yeast infection of the skin.	Hypersensitivity to terbinafine or any of the ingredients of formulation.	Redness occurs at the application site, this however does not lead to discontinuation of treatment.	The cream is to be used with caution in patients with lesion where alcohol could be irritating
